POST MASTECTOMY REHABILITATION

BACCI & GLINN PHYSICAL THERAPY, INC.

"Therapy with a Difference"

Post Mastectomy Rehabilitation

According to the National Cancer Institute, it is estimated that the number of new cases of breast cancer in females in the United States in 2007 will be 178,000.³ In addition, it is estimated that 12.7% of women born today will be diagnosed with breast cancer.⁵

A person with breast cancer may undergo a variety of treatments, including chemotherapy, radiation, and/or surgery. Any one of the many surgical procedures can affect a person's ability to perform daily activities such as dressing, bathing, and combing your hair resulting from difficulty moving the shoulder and arm. Physical therapy is key in restoring you to your prior mobility.

Treatment Options

- ◆ Physical therapy may include all or some of the following:
 - Arm mobilization
 - Shoulder strengthening
 - Prevention and treatment of upper extremity edema
 - Aquatic therapy
 - Patient education regarding arm function

Complementary therapy may also be used along with medical treatment.

Be sure to talk with your physician prior to trying any of the following:

- Acupuncture
- Herbs
- Biofeedback
- Meditation
- Yoga
- Vitamins

Signs and Symptoms

- ◆ A change in the way the breast feels
- ◆ A change in the way the breast looks
- ◆ A change in the nipple, such as turning in, scaly skin around it, or discharge

Risk Factors

- ◆ Gender
- ◆ Age
- ◆ Heredity/Genetic Factors
- ◆ Long menstrual history
- ◆ Never having children
- ◆ Hormones
- ◆ Personal history of breast or ovarian cancer
- ◆ Environmental factors
- ◆ Early Menopause
